How Tabata Timer is different from other applications? Timing Tabata training In general, most of the other timers that can help you in the timing of the work and rest of the rounds that compose this type of workout are not made to be used with specific exercises, but you have to use them for every type of physical activity that you want to break up into intervals, and you have to look for specific functions in each of them. With Tabata Timer, there are two functions that you will find, one to allow you to program the rest and work interval duration and the other to allow you to program the rounds that compose the exercise you are performing. Programming the rounds in which you will work during the exercise is a bit more complicated, since it has to do with the "parameters" of the exercise itself. For example, during the single round exercise, a set of 2 minutes and 20 seconds is mandatory, but during the sequence of rounds that compose the exercise, it is necessary to have a fixed duration for each round. With that in mind, Tabata Timer will
